

Q: What is an out-swing door?

A: Out-swing door means a person pulls the door to get in from outside.
An electric lock has to be installed inside without bracket
Please refer to the diagram below.

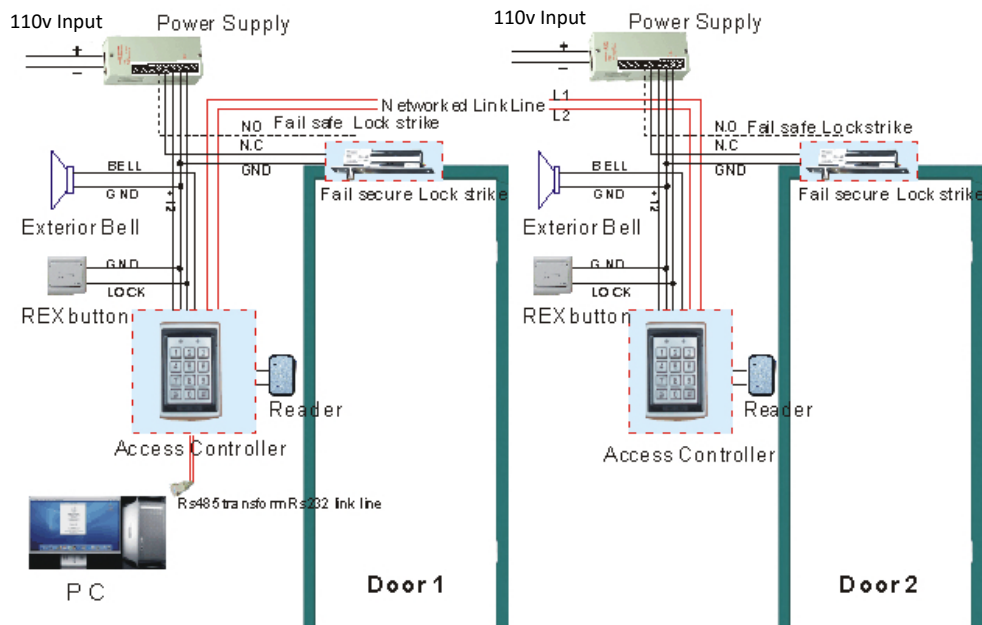

Q: What is an in-swing door?

A: In-swing door means a person pushes the door in from outside.
An electric lock has to be installed inside with bracket (L/ZB) in order to prevent any attempt vandalize from outside.

Note: Regardless the type of door used, the lock must be installed or mounted indoors.
