System Overview

With a 1/2.7 inch progressive scan CMOS image sensor, you can view this 2MP camera up to 30fps. It has 4 built in LEDs for IR (infrared) night vision, which allows you to see up to 197 feet in complete darkness. The camera has an IP67 protection rating so it is well protected against dust and water. It also features 4KV lightning protection for the camera itself and its housing, protecting it against strikes of lightning. The camera also has long distance transmission capabilities, allowing you to transmit up to 2625 feet in 1080p and 3938 feet in 720p.

Functions

HD-over-Coax

HD-over-Coax is a new analog high definition (HD) video standard transmitting over coaxial cable. The technology provides transmission of HD video as well as audio, and two-way control data over long distances. You can implement an HD system using the same coax cables that your existing analog system is running on. HD-over-Coax installs just like analog cameras and gives you up to 1080p High Definition. No fiber, no configuring, and no special training required.

Long Distance Transmission

HDCVI technology guarantees real-time transmission at long distance without any loss. It supports up to 800m(1080P)/1200m(720P) transmission via coaxial cable, and up to 300m(1080P)/450m(720P) via UTP cable.*

*Actual results verified by real-scene testing in Dahua's test laboratory.

Simplicity

HDCVI technology inherits the born feature of simplicity from traditional analog surveillance system, making itself a best choice for investment protection. An HDCVI system can seamlessly upgrade the traditional analog system without replacing existing coaxial cable. The plug and play approach enables full HD video surveillance without the hassle of configuring a network.

Smart IR

Smart IR is a technology built into some security cameras that adjusts the intensity of the camera's infrared LEDs to compensate for the distance of an object so that the infrared does not overexpose the object.

Multi-formats

4-in-1 Security cameras have replaced older analog only surveillance cameras also known as 960H cameras or CCTV cameras. 4-in-1 Security cameras are considered "universal cameras" because they can output three types of HD over Coax video signals (HD-CVI, HD-TVI, AHD) and analog resolution video (CVBS). The ability to easily switch video output from the cameras' BNC connector makes them compatible with all the popular security DVRs.

Multi-language OSD

The camera's OSD menu provides multiple image adjustments and function settings to meet the requirements of different monitoring scenes. It includes configurations such as backlight mode, day/night, white balance, privacy mask and motion detect. The camera also supports 11 languages for the OSD menu, namely, Chinese, English, French, German, Spanish, Portuguese, Italian, Japanese, Korean, Russian and Polish.

Protection

The camera's outstanding reliability is unsurpassed due to its rugged design. The camera is protected against water and dust with a IP67 ranking, making it suitable for indoor or outdoor environments. With working temperature range of -30 °C to +60 °C (-22 °F to +140 °F), the camera is designed for extreme temperature environments. Supporting $\pm 30\%$ input voltage tolerance, this camera suits even the most unstable power supply conditions. Its 4KV lightning rating provides protection against the camera and its structure from the effects of lightning.
