

IPOD-ELES4IR28A

4MP Starlight Turret Dome

System Overview

This dome camera will give you up to 4MP (2560 × 1440) video quality while using smart H.265 video compression to reduce both the bandwidth and storage requirements. Lighting conditions will be no obstacle, there are several features which allow this camera to deal with challenging lighting conditions. Features such as: WDR (120dB), 3D Digital Noise Reduction (DNR), Head Light Compensation (HLC), and Back Light Compensation (BLC) will ensure your video will always be balanced. With the added feature of Starlight technology that is built into this camera, the camera is able to make better use ambient illumination in low light situations to stay in color mode before needing to go into Infrared mode.

Features

Smart H.265+

Smart H.265+ technology is a collection of intelligent encoding algorithms based on H.265. To meet the characteristics of video surveillance, Smart H.265+ adopts some key video encoding techniques can be flexibly added/deleted or combined according to different applications and products. Smart H.265+ codec can effectively enhance video encoding efficiency according to the characteristics of different surveillance environments; furthermore, it can greatly reduce transmission bit rate, storage capacity to improve the overall system.

Wide dynamic range (WDR)

When part of an image is extremely dark but another part is so bright you can't see any details, that's dynamic range—the difference in lighting. Cameras with wide dynamic range (WDR) have special software that allows them to balance that lighting for one clear image. This makes them ideal for recording areas like store entrances where the contrast between the sunshine outside and the dim lighting inside can be extremely difficult to record.

Intelligent Video Analysis (IVS)

IVS system provides advanced, accurate video analytic for both IP and analog cameras. The IVS engine can track, classify and analyze the behavior of individual or group of objects over long distance to greatly improve parameter security and monitoring efficiency.

- 1/3" CMOS image sensor
- H.265 coding, high compression ration, low bit rate
- Max. supports 4MP (2688 × 1520) @ 20 fps
- Intelligent detection: Intrusion, tripwire
- Max. 256 GB SD card and built-in MIC
- Built-in IR LED, max IR distance: 30 m
- IP67 protection

Starlight

The starlight standard sensor is just like the retina of your eyes which is sensitive to its ambient light, and the image quality is determined by how much light the sensor could use, together with the camera lens. The starlight camera technology uses larger and highly sensitive sensors, wider aperture and reduces the shutter speed to collect enough light for sharp monochrome/color images, even when human eyes couldn't identify a thing. So the starlight camera can see right through the darkness, even when it is challenging for your eyes.

Protection (IP67, wide voltage)

IP67: The camera passes a series of strict test on dust and soak. It has dust-proof function, and the enclosure can work normally after soaking in 1 m deep water for 30 minutes.

Wide voltage: The camera allows ±30% input voltage tolerance (wide voltage range), and it is widely applied to outdoor environment with instable voltage.
