

PENDVR-EL164K-XI

16 Channel 4K DVR W/ IVS

System Overview

This 16 channel DVR is capable of recording up to 16 cameras that use coaxial technology plus 16 IP Network cameras for a total of up to 32 cameras. Use a combination of Analog and IP or all 32 IP cameras at up to 12MP each with a total of 128Mbps incoming bandwidth. There is room for up to eight SATA hard drives at 8TB each, plus an eSATA port so you can connect an external drive and 4 USB ports you can plug a flash drive into so you can easily copy and share smaller portions of your recorded footage as you need.

Features

Smart H.265+

Smart H.265+ technology is a collection of intelligent encoding algorithms based on H.265. To meet the characteristics of video surveillance, Smart H.265+ adopts some key video encoding techniques can be flexibly added/deleted or combined according to different applications and products. Smart H.265+ codec can effectively enhance video encoding efficiency according to the characteristics of different surveillance environments; furthermore, it can greatly reduce transmission bit rate, storage capacity to improve the overall system.

HDCVI/AHD/TVI/CVBS Auto-detect

This unit can auto recognize the signal of the camera without having to change settings.

High Definition Camera Input

The DVR supports up to 8MP HD resolution (3840 x 2160) HDCVI camera and 12MP IP camera input.

Coaxial Audio/Upgrade/Alarm

This integrated design can reduce wiring troubles and makes it easier to run audio, upgrade your camera, or trigger alarms all via the coax cable.

*CVI ONLY

Face Detection

Whether you wish to recognize, identify or verify a person, a camera with facial recognition software is an efficient solution. It can help you improve customer service and protect your assets by identifying important customers or potential perpetrators.

- H.265+/H.265 dual-stream video compression
- Supports HDCVI/AHD/TVI/CVBS/IP video inputs
- Supports 32 channels of IPC access, each channel up to 12MP input; Max 128Mbps incoming bandwidth
- All channels support Tripwire & Intrusion; First 4 channels support Object Abandoned & Missing

IoT Functionality

HDCVI IoT can achieve multi-dimensional surveillance by integrating sensors with monitoring video, which not only can generate a report for analysis but also prevent risk in advance.

POS Functionality

This function is mainly used in retail programs which can superimpose POS ticket information on the video channel to preview and record.

Smart Fan Design

The smart fan can automatically turn on or turn off according to the CPU temperature. This function reduces the fan noise to provide a better user experience.

Spot Output

The spot monitor outputs are separate and in addition to the VGA and HDMI video outputs that these DVRs support. The VGA and HDMI monitor outputs display the menu system and controls of the DVR. Spot outputs always display the live security camera views that you configure.

Intelligent Video System (IVS)

IVS system provides advanced, accurate video analytic for both IP and analog cameras. The IVS engine can track, classify and analyze the behavior of individual or group of objects over long distance to greatly improve parameter security and monitoring efficiency.

Smart Search

The smart search feature on a security recorder will allow you to skip over video that has motionless areas to get to the footage that you want to review. This is a great feature especially if you record in real time and have multiple cameras.
