

PENDVR-EL32-X

32 Channel 2U 4K DVR

System Overview

The AI-revolution is now complete across our entire HD DVR line with the release of the new PENDVR-EL32-X. Our most advanced Pentabrid DVR to date, the PENDVR-EL32-X has all the bells and whistles one can ask for. Supporting 4K/8MP resolutions over coax and up to 12MP resolution over IP (at a maximum total bandwidth of 128Mbps) take your video to the next level at crystalline UHD resolution that actually makes use of that fancy new TV you got for Christmas. With dual-HDMI and VGA out, businesses can use the spot-out functionality to create custom second-screen views for lobbies or front-of-house staff. Dual Gigabit Ethernet ports allow installers to keep all their IP cameras off the main network, reducing cross-network traffic for both cameras and other users while providing a natural layer of security to any IP cameras connected to the DVR.

Features

Real Time Face Recognition

With real time face recognition you can use facial features including gender, age, expression, glasses, or even facial hair to identify faces on a real time video stream. This allows you to identify people and also be able to capture a face for storage and record faces with metadata. You can use facial feature filtering while monitoring in real time to show faces with target features.

Perimeter Protection

Perimeter Protection functions significantly improve accuracy. Perimeter Protection reduces false alarms and decreases pixel count requirements for object detection. Perimeter Protection features custom tripwires based on object type for automation in limited access areas such as pedestrian or vehicle-only zones. This combination of advanced AI analytics and real-time alerts to a desktop or a mobile client reduces system requirements as well as resources, resulting in greater surveillance system efficiency

SMD Plus

SMD Plus, referred to as Smart Motion Detection Plus, which is an upgraded version of SMD that greatly improves the alarm accuracy by loading deep learning algorithm. It analyzes person and vehicle shapes based on motion detection and send alarms only when a person or vehicle intrudes.

HDCVI/AHD/TVI/CVBS Auto-detect

This unit can auto recognize the signal of the camera without having to change settings.

- H.265+/H.265 dual-stream video compression
- Supports HDCVI/AHD/TVI/CVBS/IP video inputs
- Stream Perimeter protection on up to 6 analog channels
- Stream SMD Plus on up to 32 analog channels
- Stream Face recognition on up to 6 analog channels
- IoT & POS functionalities

SMART H.265+

Smart H.265+ technology is a collection of intelligent encoding algorithms based on H.265. To meet the characteristics of video surveillance, Smart H.265+ adopts some key video encoding techniques can be flexibly added, deleted or combined according to different applications and products. Smart H.265+ codec can effectively enhance video encoding efficiency according to the characteristics of different surveillance environments; furthermore, it can greatly reduce transmission bit rate, storage capacity to improve the overall system.

Audio, Upgrade, Alarm Over COAX

This integrated design can reduce wiring troubles and makes it easier to run audio, upgrade your camera, or trigger alarms all via the coax cable.

Long Distance Transmission

This recorder supports long distance transmission over coaxial cable and UTP. 700m for 4K/4MP, 800m for 1080P and 1200m for 720P.

AI Search

Using stored information you can quickly identify people and vehicles from massive video data. This makes it easier to trace back to a certain person vehicle or point in time. Now you can search for targets with ease.
